

An aerial photograph showing a two-lane asphalt road that curves through a dense, green forest. The road is bordered by a rocky shoreline on one side and a calm, turquoise lake on the other. The text "Clean air everywhere" is overlaid in the top left corner in a large, white, sans-serif font.

Clean air everywhere

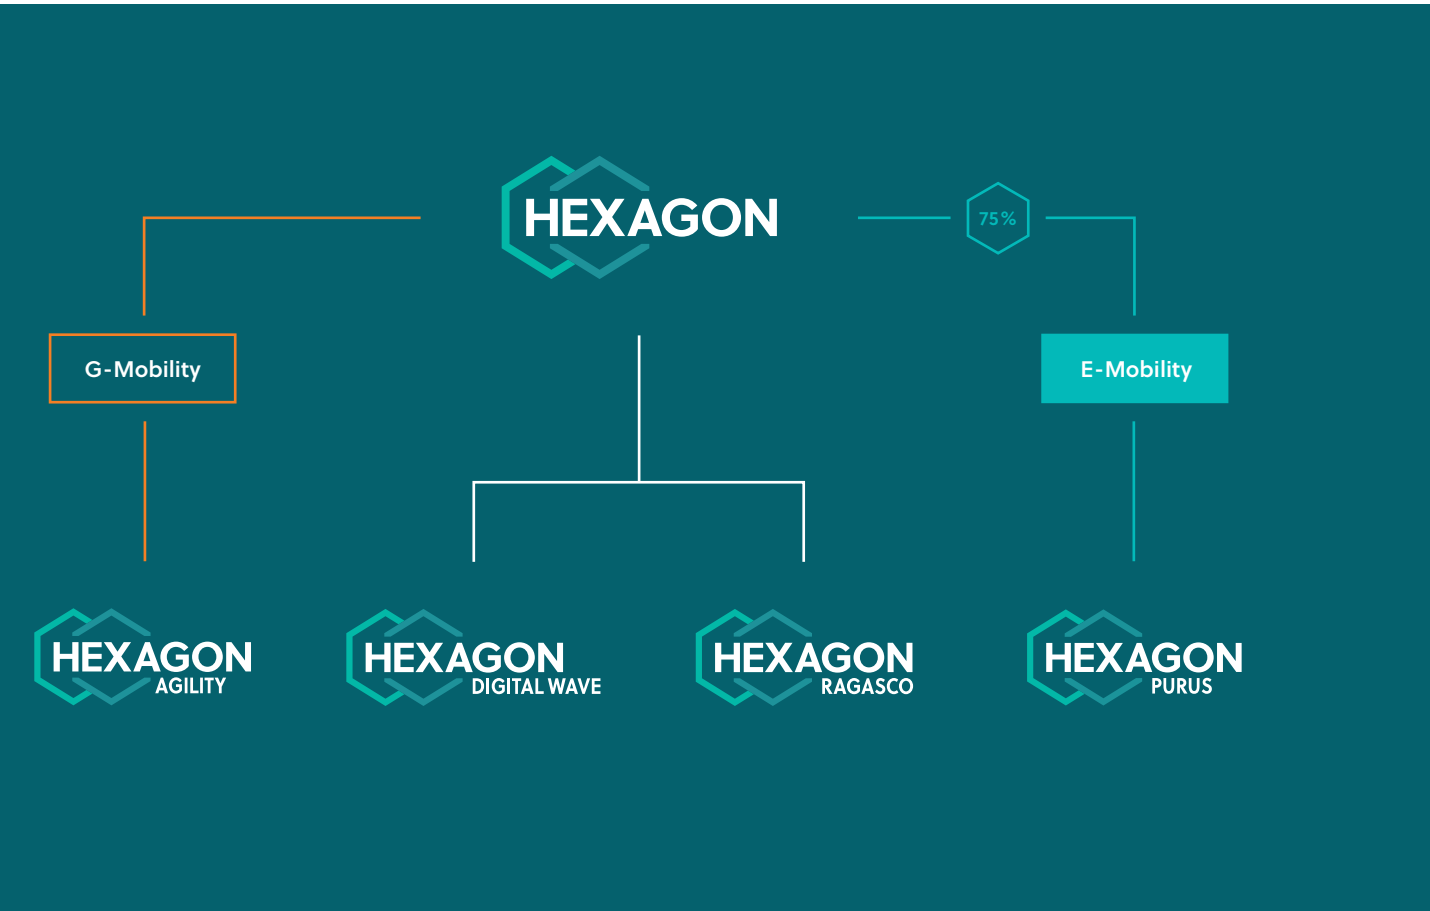

For a cleaner energy future

Hexagon Composites ASA

Hexagon delivers safe and innovative solutions for a cleaner energy future. Our solutions enable storage, transportation, and conversion to clean energy in a wide range of mobility, industrial and consumer applications including light-, medium- and heavy-duty vehicles, ground storage, distribution, maritime, rail and backup power solutions.

With extensive experience in pressure cylinders development since the early 1960s, our long and proud history is rooted in innovation and change. We have a strong international presence with facilities in Norway, Germany, USA and Canada, and sales representation in some of the world's most important clean energy markets in Europe, Asia and the Americas.

Targeting a zero-emission society

Hexagon Purus

Hexagon Purus enables zero-emission mobility for a cleaner energy future. Hexagon Purus is a world leading provider of hydrogen Type 4 high-pressure cylinders, complete vehicle systems and battery packs for fuel cell electric and battery electric vehicles (FCEV & BEV) including hybrid mobility applications on light-, medium- and heavy-duty vehicles, transit buses, ground storage, distribution, maritime, rail, aerospace and backup power solutions.

Hexagon Purus is dedicated to Hexagon's zero-emission activities. Its solutions serve a wide range of mobility and storage applications.
